

## EHS COORDINATOR (Vancouver BC)

### **Work with game-changing technology. Make a difference.**

How often does an opportunity come along to work for a company focused on environmental protection and sustainability? We specialize in mine water management and enable mineral extraction projects to not only comply with stringent government regulations but also to operate in a socially responsible manner, putting value on clean water as a shared resource. We develop new technologies, design and operate water treatment plants, and provide ongoing technical support which enables us to continuously improve our designs and technologies.

### **The opportunity**

Play a key role in supporting the overall growth of the company by developing, implementing and maintaining environmental, health and safety systems across our operations and project activities. You will be relied on to provide leadership in all aspects of EHS as a department of one. You will:

- Develop, implement and monitor systems, processes and procedures to maintain the highest levels of health, safety, quality and environmental performance throughout the company (operations, laboratories, projects and offices)
- Establish site specific EH&S requirements based on local codes and jurisdictions
- Proactively conduct strategic assessments of health, safety, compliance and environmental costs
- Monitor legal and regulatory changes in the jurisdictions where the company operates and update all systems accordingly in a timely manner
- Provide continuous evaluations of trends and best practices
- Perform hazard analysis and safety audits as required
- Monitor and report EH&S performance throughout the company
- Chair the internal EH&S committee
- Interface and liaise with clients on all aspects of EH&S
- Organize and oversee staff training including: MSHA, OSHA, First Aid, CPR, WHMIS, H<sub>2</sub>S Alive, LOTOTO

### **Qualifications and requirements**

- Knowledge of EHS Regulations such as WorkSafe BC and its equivalents in other provinces
- Familiarity with regulations in other jurisdictions in which we operate is an asset (OSHA and MSHA)
- Completion of Occupational Health and Safety Certificate (NSCO)
- Proven effective communicator – you are articulate and can get your message across clearly both verbally and in written form
- Ability to act as a department of one – you are strategic and tactical
- Build effective working relationships at all levels within the company, clients and contractors
- Strong attention to detail and ownership; able to manage multiple priorities and adapt to fast changing situations
- Ability to handle sensitive and confidential information in an efficient and professional manner
- Proficient in Microsoft Office (Word, Excel, PowerPoint, Outlook)
- Travel within North America and internationally as required

# BQE Water

- Flexible/hybrid work environment but preference is given to candidates who will be working from our office most days
- Diploma or current standing as a Canadian Registered Safety Professional (CRSP) is an asset
- Certified Health and Safety Auditor designation is an asset
- Proficiency in Spanish, French or Mandarin is an asset

## **About us**

BQE Water is a service provider specializing in mine water treatment and management solutions that support and improve the performance of mining and smelting operations. In commercial production since 2001, we have water treatment professionals including engineers, operators and technicians working on three continents: North and South America, and China. We have a diverse and inclusive team, offer a casual work environment and have a strong focus on teamwork to support our clients' unique water requirements.
