

MINTO WTP SHIFT SUPERVISOR

(Yukon Territories, Canada)

Make a Difference

How often does an opportunity come along to work for a company focused on environmental protection and sustainability? We specialize in mine water management and enable mineral extraction projects to not only comply with stringent government regulations but also to operate in a socially responsible manner, putting value on clean water as a shared resource. We develop new technologies, design and operate water treatment plants, and provide ongoing technical support which enables us to continuously improve our designs and technologies.

The opportunity

Reporting to the Operations Manager, the Shift Supervisor position provides leadership to the water treatment plant operators to develop a culture committed to safety, environmental awareness and continuous improvement. Responsibilities of the role include:

- Support and develop strategies to effectively implement plant goals and objectives.
- Support day-to-day plant operations including coordinating activities and maintaining good working relationships with mine site management, clients, vendors and BQE Water team members.
- Responsible for all aspects of water treatment plant operations, maintenance and safety:
 - Plant capacity
 - Effluent quality
 - Reagent and power consumption
 - Commissioning and start-up
 - EH&S metrics
- Manage material/consumable inventories and coordinator with site owner for reorders.
- Review, provide input into and approve maintenance plans for water treatment plants.
- Proactively identify areas of operational improvements.
- Meet plant performance goals and report on performance to clients and the Vancouver, Canada head office.
- Learn and maintain process automation for the treatment plant (i.e. control philosophies, instrument specification, PLC/HMI programming).
- Provide leadership in BQE Water and client safety protocols and environmental compliance.
- Support our engineering design and technology development teams by reconciling process data, reagent consumption, lessons learned and plant utilization.
- Maintain the operating manual and plant standard operating procedures.
- Assist our EH&S and Operations Managers with Health & Safety documentation and site audits.
- Ensure the plant operates in compliance with health, safety, and environmental regulations.
- Coordinate process training and ongoing professional development for the operators.

Your background

- Operations background with a minimum of 3 years of supervisory experience preferably.
- Committed to continuous improvement of safety, environment, customer service, operation and quality performance.
- Proven effective communication skills – you're able to get your message across clearly.

BQE Water

- Strong attention to detail and taking responsibility for getting it right.
- Ability to work both independently and as a collaborative team member.
- Self-motivated and results oriented; you take initiative to get things done safely.
- Strong mechanical aptitude – you have built things before and can figure out how things work.
- Knowledgeable and proficient with standard computer software programs and database systems.
- Valid driver’s licence, current Emergency First Aid and CPR, and forklift experience/ticket is an asset.
- Ability to travel to and from the remote site on a two weeks on/off rotation, working 12-hr day shifts.

About us

BQE Water is a service provider specializing in mine water treatment and management solutions that support and improve the performance of mining and smelting operations. In commercial production since 2001, we have water treatment professionals including engineers, operators and technicians working on three continents: North and South America, and China. We have a diverse and inclusive team, offer a casual work environment and have a strong focus on teamwork to support our clients’ unique water requirements. Visit www.bqewater.com to learn more.
